FOREWORD

The Department of Basic Education (DBE) is pleased to release *Education Statistics in South Africa 2010*, the 12th such publication since 1999. The publication contains statistics on national schooling from Grade R to Grade 12, early childhood development (ECD), and schools with special needs subsectors.

Action Plan to 2014, which forms part of the larger South African education vision of Schooling 2025, places a high priority on improved reporting and accountability in education, which relies on quality data and information. It is the responsibility of the education system to ensure that such data and information are available.

Furthermore, the Outcomes-Based Performance Management System, which was adopted by the Presidency to enhance service delivery, accentuates the value of education statistics for planning and monitoring and evaluation. This publication provides the information on which evidence-based decision-making depends.

The availability of education data for the past 12 years facilitates the analysis of trends in the education system over time. The statistics also serve as a measure of the success of education policies, and as proof that the DBE and the provincial education departments (PEDs) have been achieving their objectives.

The publication details the shape and size of the education system in South Africa, specifically in regard to numbers of learners, educators and schools. This means that education planners and decision makers and those entrusted with monitoring, evaluating and accounting for progress in the schooling system will have access to the necessary statistical evidence that will enable them to act in a suitable manner in order to achieve key education objectives and to increase efficiency and effectiveness in the system.

National Treasury is still recognised as the main user of these statistics, which inform the allocation of financial resources to education.

Stakeholders in education, such as researchers, publishers and statutory bodies, are welcome to utilise the information contained in this publication in their endeavours to improve the delivery of education in the country. The education statistics in this publication also form the basis for calculating education indicators reported to UNESCO, which enables South Africa to assess its achievement against the requirements of Education For All (EFA) and the Millennium Development Goals (MDGs) for the Second Decade of Education in Africa.

The content of the publication has been altered slightly to accommodate recent structural changes to government departments. That is, the publication will now report only the information that relates to schooling in the country – namely, public and independent schools, special schools and ECD centres – and will exclude statistics on further education and training (FET) colleges, adult basic education and training (ABET) centres and higher education (HE) institutions, since these institutions are now under the jurisdiction of a separate department, that of Higher Education and Training

Now that there are fewer subsectors on which to report in this publication, we have the opportunity to include other education statistics that are of importance to education stakeholders – for instance, the verification results of the Annual National Assessments (ANA) of Grades 3 and 6. Statistics on staff provision in South African schools are also included.

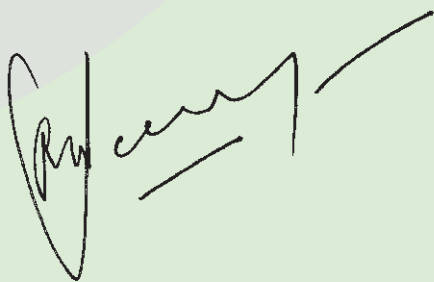

In the quest for improving the quality of education data, a random sample of institutions in the country is selected for external auditing of their data. The results of the audit are reported to the Council of Education Ministers and, via the PEDs, to the institutions. Therefore, I would like to remind all institutions that, as sources of education information, they might be selected at random to have their data audited to determine the accuracy of the information that they keep and on which they report.

The statistical quality of the data provided in the publication has furthermore been improved by ensuring that the systems and techniques for acquiring and processing education information are subjected to annual quality audits and compliancy monitoring.

The report includes several indicators that contribute towards the monitoring and evaluation of education policies and service-delivery programmes. These serve to guide crucial policy interventions and strategies. Indicators such as learner-educator ratio (LER), learner-school ratio (LSR), educator-school ratio (ESR), gross enrolment ratio (GER) and gender parity index (GPI) give an idea of the progress that government is making towards the achievement of access and quality in education.

This publication would not have been possible without the contribution of the heads of the nine provincial Education Management Information Systems (EMIS) units and their staff, regional and district officials, school principals, special school principals, and ECD centre managers, who had the challenging task of setting up, managing and maintaining the management information systems that yielded its contents. We also remain deeply indebted to other partners in the education environment, whose ongoing feedback and recommendations will provide the basis for the further development and improvement of statistical reporting on education in South Africa.

I thank the provinces yet again for their efforts, in 2010, towards the collection of education information.

1. INTRODUCTION

The Department of Basic Education (DBE) collects, processes and integrates education-related data obtained from the nine provincial education departments (PEDs). The DBE then analyses these data on learners, educators and institutions throughout the education system and reports on the outcome of the analysis. Education sectors such as ordinary public and independent schools (**hereinafter collectively referred to as ordinary schools**), early childhood development (ECD) centres and special schools, which cater for special needs education (SNE) learners, contributed data for this publication. Adult basic education and training (ABET) centres, further education and training (FET) colleges, and higher education (HE) institutions are now the responsibility of the Department of Higher Education and Training.

In recent years, an effort has been made to improve the turn-around time of reporting so as to produce timely information on the education system. These efforts are bearing fruit in that official publications of EMIS data are available earlier than in previous years.

This publication covers, in the main, data for the 2010 reporting year. However, some data for previous years are provided to allow for comparative analysis over time. The sources of data used for the report are the following:

- Ordinary schools – 2010 SNAP Survey conducted on the 10th school day.
- National Senior Certificate examination – *Report on the National Senior Certificate Examination Results 2010*, DBE (January 2011).
- Annual National Assessments (ANA) – *Report on the Annual National Assessments of 2011*, DBE (June 2011). *The 2011 Grade 3 and 6 Verification Annual National Assessment report*, HSRC (November 2011).
- ECD and SNE: 2010 Annual Surveys, except for the SNE data for North West, which were extracted from the SNAP Survey.
- Population figures – 2010 Statistics South Africa estimates published in July 2011.

2. OVERVIEW OF THE EDUCATION SYSTEM IN SOUTH AFRICA

The centrefold shows that, in South Africa in 2010, there were 30 586 established public and registered independent education institutions that submitted the survey forms. Of these, 25 850 were ordinary schools and 4 736 were other education institutions – namely, ECD centres and special schools.

The figure of 25 850 for ordinary schools comprised the following:

- 14 456 primary schools, with 5 992 863 learners and 187 520 educators;
- 6 231 secondary schools, with 3 821 763 learners and 142 181 educators; and
- 5 163 combined and intermediate schools, with 2 445 473 learners and 88 408 educators.

Figure 1: Percentage distribution of learners in the education system in 2010

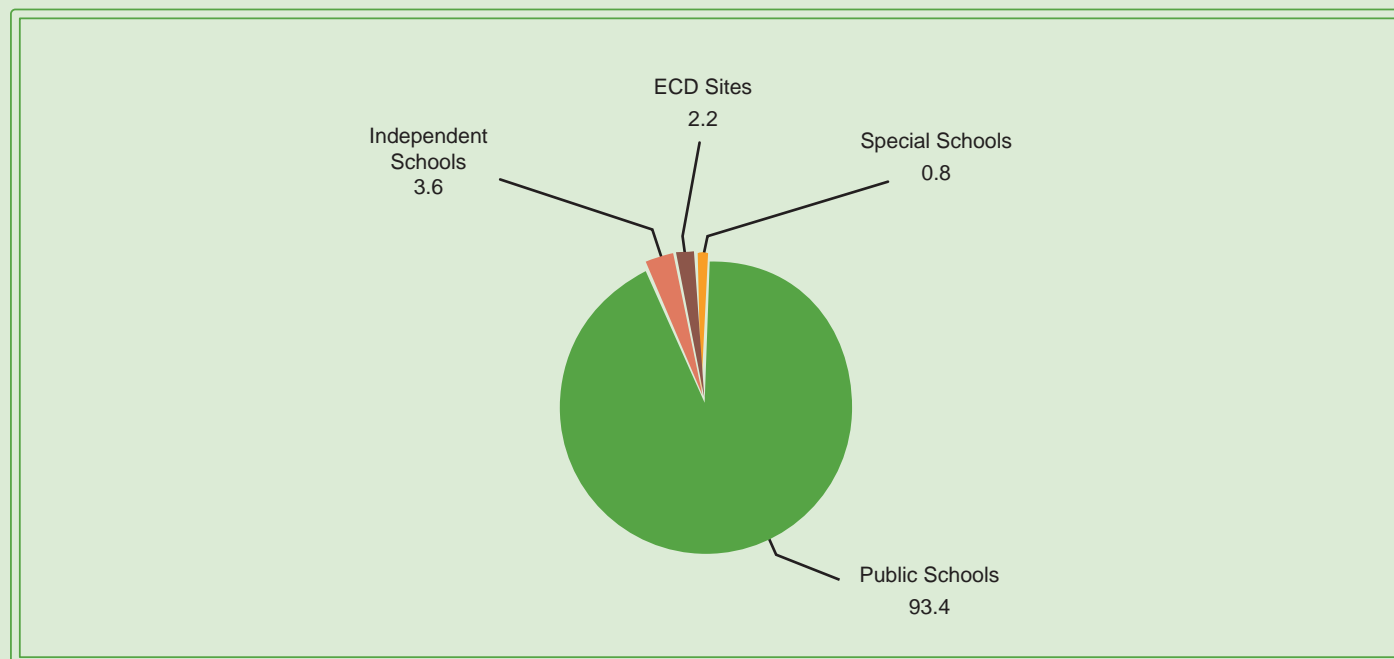

Figure 1, Table 20 and the centrefold show that, of the 12 644 208 learners and students enrolled in all sectors of the basic education system in 2010, 11 810 224 (93.4%) were in ordinary public schools and 449 875 (3.6%) were in ordinary independent schools. Of the learners in other institutions, 279 476 (2.2%) were in ECD centres and 104 633 (0.8%) were in special schools.

In summary, there were 12 644 208 learners and students in the basic education system, who attended 30 586 education institutions and were served by 439 394 educators.

3. ORDINARY PUBLIC AND INDEPENDENT SCHOOLS

3.1 Introduction

The data on ordinary schools were collected via the 2010 SNAP Survey conducted on the 10th school day. Approximately 99.8% of open ordinary schools submitted the survey forms, and imputation was done to establish a data set of 100%. The figures in this publication are final after the preliminary figures that appeared in the Department's report *School Realities 2010* were updated.

3.2 Basic school data

Source: 2010 SNAP Survey.

3.2.1 Schools (see Tables 2 and 3)

In 2010, there were 25 850 ordinary schools in South Africa. KwaZulu-Natal (6 147, or 23.8% of the national total) and the Eastern Cape (5 742, or 22.2% of the national total) had the highest and second highest number of ordinary schools, while the Northern Cape (617, or 2.4% of the national total) had the smallest number. Of the 25 850 schools in the country, 1 397 (5.4%) were independent schools.

3.2.2 Learners (see Tables 2 and 3)

In 2010, there were 12 260 099 learners in ordinary schools in the country as a whole. Three provinces – namely, the Free State, the Northern Cape and North West – showed less than a million learners in ordinary schools. In the Eastern Cape and KwaZulu-Natal more than two million learners were enrolled in ordinary schools, comprising, respectively, 16.7% and 22.9% of the national total. Of the 12 260 099 learners in the country, 449 875 (3.7%) were in independent schools.

3.2.3 Educators (see Tables 2 and 3)

There were 418 109 educators in ordinary schools in South Africa in 2010. KwaZulu-Natal (91 926, or 22.0% of the national total) had the largest number of educators in ordinary schools, while three provinces – namely, the Free State, the Northern Cape and North West – had fewer than 30 000 educators each. Of the 418 109 educators in the country, 28 740 (6.9%) were employed in the independent school sector.

3.2.4 Distribution of learners, educators and schools

Figure 2: Percentage distribution of learners, educators and schools in the ordinary school sector, by province, in 2010

The mainly rural provinces tend to have proportionally more schools with fewer learners than the more urbanised provinces, which tend to have proportionally fewer schools with more learners, an indication of higher population density. Figure 2 shows that, in 2010, the Eastern Cape, one of the more rural provinces, had 22.2% of the national total of ordinary schools serving 16.7% of South Africa's learners, while Gauteng, the most urbanised province, had 9.6% of the national total of ordinary schools serving 16.1% of the country's learners.

Figure 3: Distribution of learners, educators and schools in the independent school sector, as a percentage of provincial totals in the ordinary school sector, by province, in 2010

Figure 3, as calculated from Tables 2 and 3, indicates that, in 2010, Gauteng had the largest proportion of learners, educators and schools (9.9%, 18.3% and 18.9%, respectively) in the independent school sector, while the Northern Cape had the smallest proportion of learners and educators (1.1% and 2.6%, respectively), and the Eastern Cape the smallest proportion of schools (2.7%).

3.2.5 Indicators

- Learner-educator ratio (LER) (see Table 3)**

In 2010, the average LER for ordinary schools in the country was 29.3:1, ranging from 27.5:1 in the Free State to 30.5:1 in KwaZulu-Natal and the Northern Cape.

- Learner-school ratio (LSR) (see Table 3)**

The average LSR for ordinary schools in South Africa was 474:1 in 2010, ranging from 357:1 in the Eastern Cape to 794:1 in Gauteng. In three provinces (Gauteng, Mpumalanga and the Western Cape), the ratio was higher than the national average.

- Educator-school ratio (ESR) (see Table 3)**

In 2010, the average ESR for ordinary schools in the country was 16.2:1, ranging from 12.0:1 in the Eastern Cape to 28.3:1 in Gauteng.

- Gross enrolment ratio (GER) (see Table 4)**

Table 4: Gross enrolment ratio (GER) and gender parity index (GPI) in ordinary schools, by province and gender, in 2010

Province	Gender	School Phases (Gr. 1-12)						School Bands (Gr. R-12)					
		GER (%)			GPI			GER (%)			GPI

Source 1: 2010 SNAP Survey.

Source 2: Population estimates, Statistics South Africa (July 2011).

Note 1: Underlying population data not shown in publication.

Note 2: GER values have been rounded off to whole numbers.

Education in ordinary schools could be grouped in terms of either the GET and FET bands or the traditional primary and secondary phases. The GET band (Grades R to 9) caters for the following phases: foundation phase (Grades R to 3), intermediate phase (Grades 4 to 6) and senior phase (Grades 7 to 9). The FET band caters for Grades 10 to 12 and excludes learners in FET colleges.

GER is defined as the number of learners, regardless of age, enrolled in a specific school phase (e.g. primary phase for Grades 1 to 7) as a percentage of the total appropriate school-age population (e.g. seven- to 13-year-olds for the primary phase). For example, a GER of more than 100% indicates that there are more learners in the formal schooling system than in the appropriate school-age population (total potential population), which indicates enrolment of under-aged and over-aged learners owing to early or late entry and grade repetition.

In 2010, as shown in Table 4, the national total GER for the combined GET and FET bands (Grades R to 12) was 89%, which is lower than the GER of 91% for the combined primary and secondary phases (Grades 1 to 12). This is perhaps due, mainly, to the fact that a significant number of Grade R learners of the appropriate school age are not in ordinary primary schools. Some provinces reflected GER values of more than 100% for the various GER groupings, suggesting that inappropriately-aged learners were enrolled in those groupings. For the secondary phase and the FET band, the national GER was higher for females than for males, indicating that, relative to the appropriate school-age population, there were more female learners than male learners in the school system. It could also mean that, for a variety of reasons, female learners remain in the system longer than male learners.

Figure 4: Gross enrolment ratio (GER) for Grades R to 12 in ordinary schools, by province and gender, in 2010

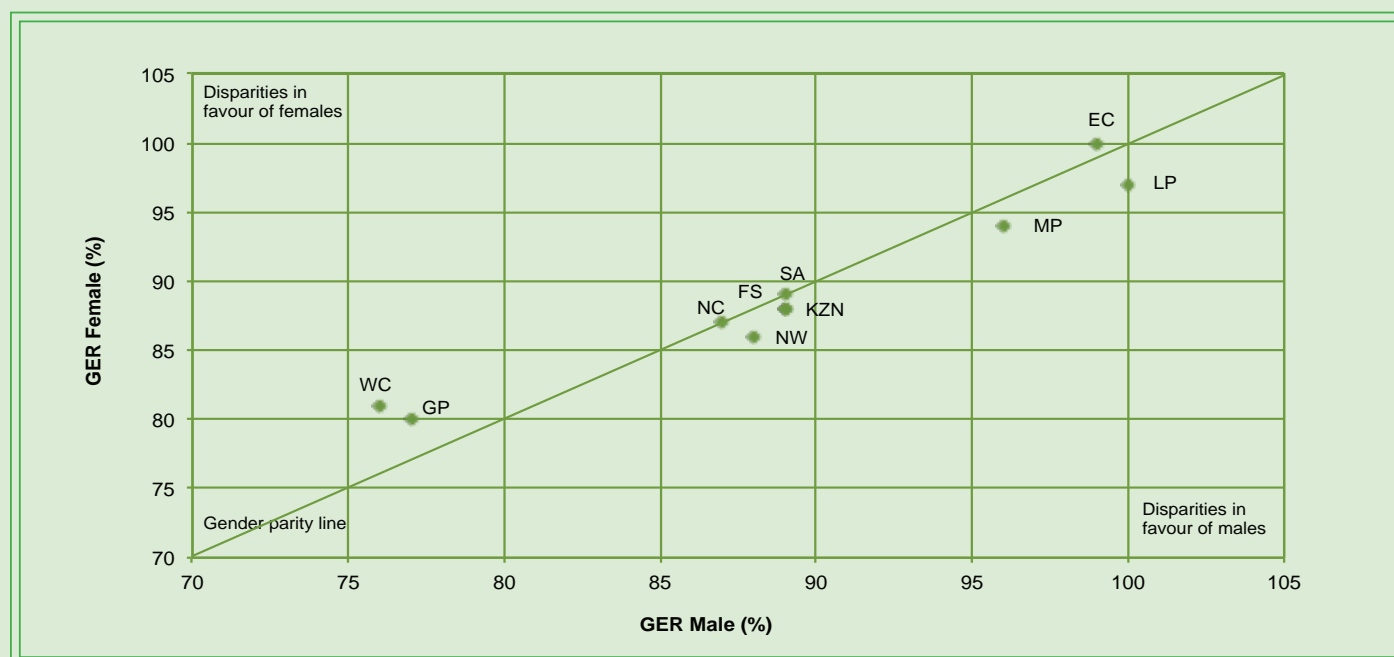

Figure 4 compares the total GER for male and female learners, Grades R to 12, in 2010. If the GER value for a province lies above the gender parity line, this shows that more female learners than male learners of the same appropriate school-age population are enrolled, which indicates a disparity in favour of females. The provinces with the largest gender gap – that is, whose GER values lie furthest from the gender parity line – were the Western Cape in favour of females, and Limpopo in favour of males. One province – namely, the Northern Cape – showed no gender gap.

- **Gender parity index (GPI) (see Table 4)**

GPI is defined as GER for females divided by GER for males. This index is used to indicate the level of access to education that females have, compared to the level of access that males have. For example, a GPI of more than 1 indicates that, in proportion to the appropriate school-age population, there are more females than males in the school system. In 2010, as indicated in Table 4, the national highest GPI (1.12) was reflected in the FET band and the lowest in the primary phase (0.96), confirming that, relative to the appropriate school-age population, there were more female learners in the FET band than there were in the primary phase.

Figure 5: Gender parity index (GPI) for Grades R to 12 in ordinary schools, by province, in 2010

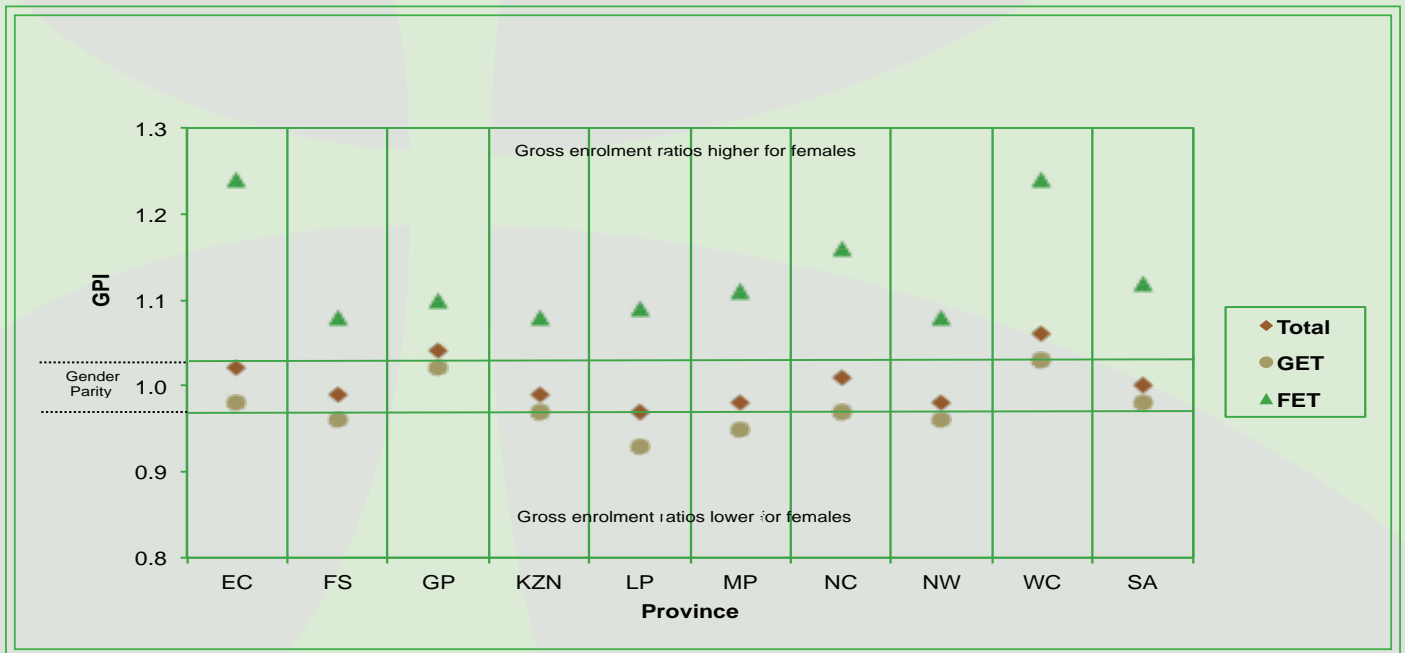

Figure 5 shows the GPI for Grades R to 12 (GET and FET bands), by province, in 2010. Gender parity is considered to have been attained when the GPI lies between 0.97 and 1.03 (Global Education Digest 2005, UNESCO Institute for Statistics). Gender parity in the combined GET and FET bands has been achieved in seven of the nine provinces. However, in Gauteng and the Western Cape the GPI was greater than 1.03. The GPI deviated from the norm most strongly in the FET band. Every province reveals a GPI of greater than 1.03.

Source:	2010 SNAP Survey.	Note 1:	Data are for ordinary schools only and exclude learners at stand-alone ECD sites and special schools.	Note 2:	Owing to a shortage of space in the table, the male enrolment figures for ordinary public and independent schools are intentionally omitted in the provincial data, but they are included in the national data.	1)	Learners not grouped in any of the grades provided – for example, SNE learners in separate classes (not those in mainstream classes) and post-matric learners..				

Figure 6: Percentage distribution of learners in ordinary schools, by phase, in 2010

Figure 6 reveals that, in 2010, the highest proportion of learners in ordinary schools was located in the foundation phase (30.9%), while the FET band comprised only 20.1% of learners. The proportion of learners in the pre-Grade R phase was very low (0.4%). This is not surprising, as it is not the policy intent of government to provide pre-Grade R programmes in schools.

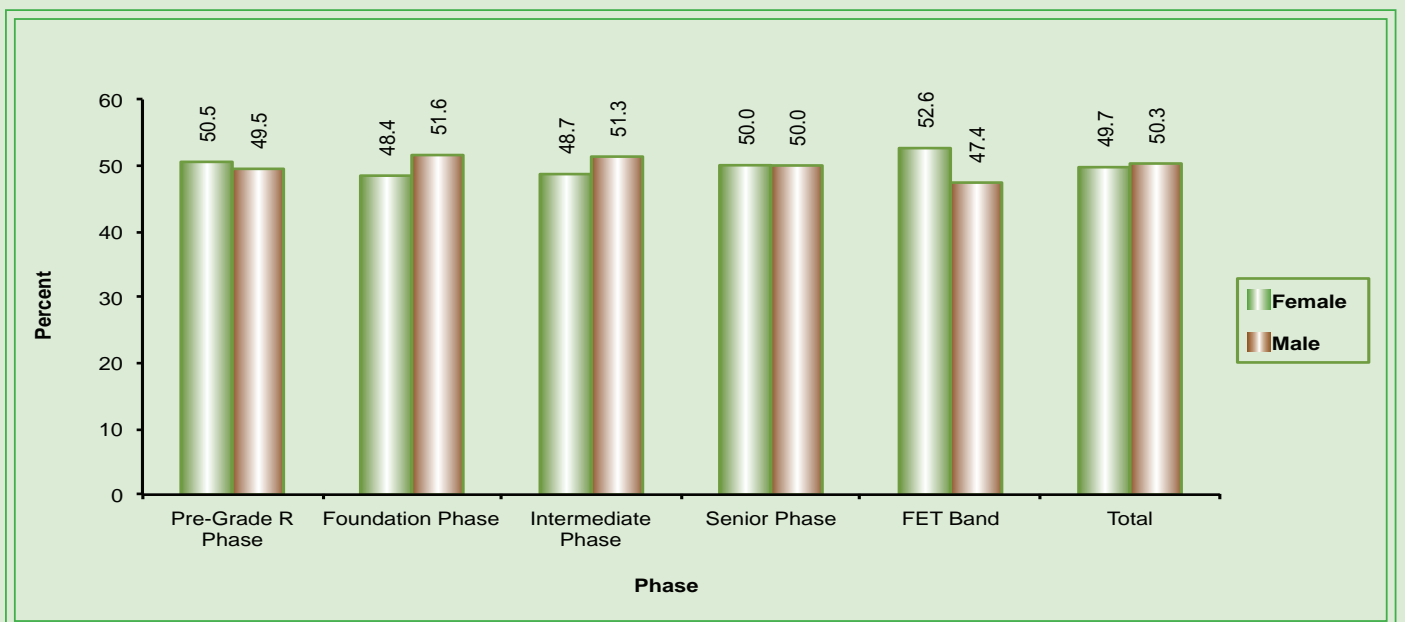

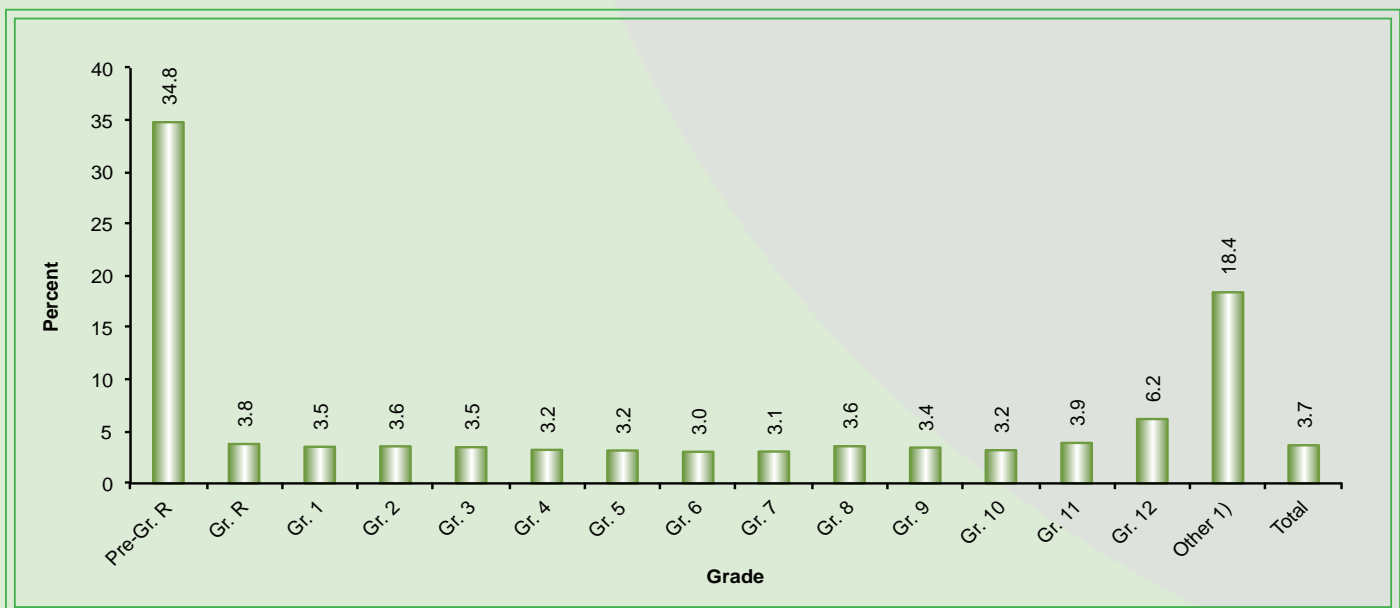

Figure 7: Percentage distribution of learners in ordinary schools, by phase and gender, in 2010

Figure 7 indicates that, in 2010, females and males were almost equally represented in ordinary schools in South Africa (females 49.7% and males 50.3%). There were more males than females in the foundation and intermediate phases, as many males as females in the senior phase, and more females than males in the other two phases. The highest percentage of females (52.6%) was found in the FET band.

Figure 8: Percentage distribution of female learners in ordinary schools, by grade, in 2010

1) Included as a grade in this figure in order to offer a complete picture of all learners in the ordinary school sector.

In 2010, as indicated in Figure 8, there were fewer female than male learners (less than 50%) in Grades R to 6, Grade 8, and Other, while the opposite was true for the other grades. Grade 12 females (54.8%) accounted for the highest female enrolment in all the primary and secondary-level grades. The lowest female enrolment was for Other (39.0%).

Figure 9: Distribution of learners in ordinary independent schools as a percentage of ordinary school learners, by grade, in 2010

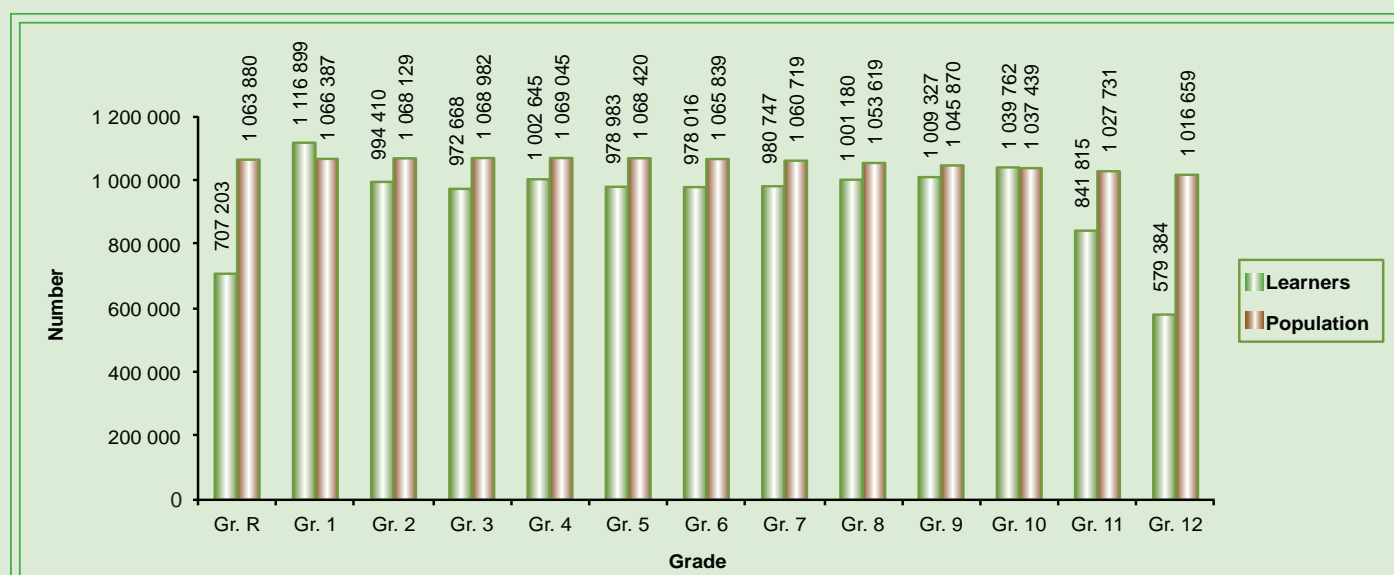

1) Included as a grade in this figure in order to offer a complete picture of all learners in the ordinary school sector.

Figure 9 shows that, in 2010, the percentage of learners in independent schools in the ordinary school system was the highest for pre-Grade R (34.8%), the second highest for Other (18.4%), and the lowest for Grade 6 (3.0%). The total national average of learners in independent schools was 3.7%.

Figure 10: Number of learners in ordinary schools, by grade, compared with the appropriate age group in the population, in 2010

Source: Population estimates, Statistics South Africa (July 2011).

Figure 10 shows learner enrolment in 2010 as compared to the appropriate school-age population for each grade (taking the year in which a learner turns seven as the appropriate age for entry into Grade 1). Grades 1 and 10 were over-enrolled, which probably indicates enrolment of over-aged and under-aged learners. From Grade 11 to Grade 12 there was a significant increase in the degree of under-enrolment. The highest under-enrolment was experienced in Grades R and 12, which reflected an enrolment of 66.5% and 57.0%, respectively, of the appropriate school-age population. It must be noted that some learners who were at the FET band age were also enrolled in FET colleges and that others attended ABET classes, which is not a compulsory schooling phase.

Figure 11: Percentage distribution of learners in ordinary schools, by grade, in 2010

1) Included as a grade in this figure in order to offer a complete picture of all learners in the ordinary school sector.

Figure 11 shows that, not counting pre-Grade R and Other, in 2010, the highest proportion of learners in ordinary schools was enrolled in Grade 1 (9.1%), while the lowest proportion was enrolled in Grade 12 (4.7%). The pattern of enrolment across grades reveals a steady decline in the proportion of learners from Grades 1 to 3, while the enrolment stayed almost the same from Grades 4 to 9. An anomaly occurs in Grade 10, where there was an unexpected increase in the proportion of learners. This could possibly be explained by higher levels of retention in Grade 10 than in other grades. The decline in the proportion of learners from Grade 11 to Grade 12 is significant, suggesting possible dropout or movement out of the schooling system to other education institutions.

2010: SNAP Survey.

As can be seen in Table 6, between 2007 and 2010, learner numbers showed a net decrease of 1.1% (12 401 217 to 12 260 099), and educator numbers showed a net increase of 6.1% (394 225 to 418 109). The number of schools decreased by 0.8% (26 065 to 25 850) in the same period.

2007-2009: As published in *Education Statistics in South Africa*.

2010: SNAP Survey.

Table 7 shows that, from 2007 to 2010, the percentage of learners in ordinary independent schools nationally increased from 2.8% to 3.7%, a net increase of 32.1%.

- **Learner-educator ratio (LER) (see Table 7)**

Table 7 shows that, from 2007 to 2010, the average LER for ordinary schools in the country decreased from 31.5:1 to 29.3:1, a net decrease of 7.0%.

- **Learner-school ratio (LSR) (see Table 7)**

Table 7 shows that, from 2007 to 2010, the average LSR for ordinary schools in the country decreased from 476:1 to 474:1, a net decrease of 0.4%.

- **Educator-school ratio (ESR) (see Table 7)**

Table 7 shows that, from 2007 to 2010, the average ESR for ordinary schools in the country increased from 15.1:1 to 16.2:1, a net increase of 7.3%.

- **Gross enrolment ratio (GER) (see Table 8)**

Table 8: Comparing gross enrolment ratio (GER) and gender parity index (GPI) in the ordinary school sector, by province, from 2007 to 2010

Province	Gender	Primary and Secondary (Gr. 1-12)								School Bands (Gr. R-12)

Sources:

2007-2009: As published in Education Statistics in South Africa.

2010: SNAP Survey, and Statistics South Africa population estimates published in July 2010.

Note: Underlying population data for 2010 not shown in publication.

Table 8 shows that the total national average GER for Grades 1 to 12 decreased over the four-year period 2007 to 2010 – namely, from 94% to 91%. Although the inclusion of Grade R had a decreasing effect on the GER (Grades R to 12) values for the same period, the national averages remained almost the same – namely, 90% in two of the four years, and 89% and 91% in the remaining years.

- **Gender parity index (GPI) (see Table 8)**

Table 8 shows that, from 2007 to 2010, the national average GPI for Grades 1 to 12 remained almost the same – namely, 1.01 in two of the four years and 1.00 in the remaining years. In the same four-year period, the national average GPI for Grades R to 12 remained almost the same – namely, 1.01 in three of the four years and 1.00 in the remaining year.

Sources:

1. Ordinary public and independent schools: 2010 SNAP Survey.
2. ECD and SNE: 2010 Annual Surveys, except for the SNE data for North West, which were extracted from the SNAP Survey.

Note 1: Data include only registered institutions.

Note 2: School level, e.g. primary and secondary, is according to the distribution of learners in grades and not necessarily as originally registered.

Note 3: Institution count is based on open institutions that submitted the survey forms.

1) and 2) Including SNE learners.

3) Including learners and educators associated with pre-primary classes at primary schools.

4) Including stand-alone special schools and those attached to ordinary public and independent schools.

Note: These data exclude substitute staff.

Table 11 reflects the staff complement in ordinary schools in 2009 and 2010. Figure 12 shows the percentage distribution of the various staff types in the country for the same period. The figure indicates that the percentage distributions stayed almost the same for 2009 and 2010. It further shows that educators comprised approximately 80% of all staff members, and support staff approximately 12%.

Figure 12: Percentage distribution of staff in ordinary schools, by staff type, in 2009 and 2010

3.6 National Senior Certificate examination

3.6.1 Introduction

The National Senior Certificate (NSC) examination of 2008 was the first that was based on the National Curriculum Statement (NCS), which requires all learners in Grades 10 to 12 to take seven subjects. Two of these subjects must be South African languages, one of which must be the language of teaching and learning. In addition to two languages, all learners must offer Life Orientation and either Mathematics or Mathematical Literacy. In addition to these four compulsory subjects, learners must choose three subjects from a list of approved subjects.

To obtain an NSC a candidate must, depending on the minimum requirements, achieve either 40% or 30% in six subjects. In the seventh subject a candidate is allowed to achieve less than 30%.

Source: Report on the National Senior Certificate Examination Results 2010, DBE (January 2011).

In 2010, as indicated in Table 12, the overall national pass rate in the NSC examination was 67.8%. In all the provinces more females than males wrote the NSC examination. However, in relative terms, as indicated in Table 12 and Figure 13, the national pass rate of male candidates (69.3%) was higher than the national pass rate of female candidates (66.5%). A similar trend was seen in eight of the nine provinces, the exceptions being Gauteng. In all the provinces, more female than male candidates passed. Furthermore, Table 12 shows that the overall pass rate, by province, varied from 78.6% in Gauteng to 56.8% in Mpumalanga.

Figure 13: Percentage distribution of the National Senior Certificate examination results, by gender, in 2010**Table 13: Comparing pass rates of the National Senior Certificate examination, by province, in 2009 and 2010**

Province	Pass Rates (%)	
	2009	2010
Eastern Cape	51.0	58.3
Free State	69.4	70.7
Gauteng	71.8	78.6
KwaZulu-Natal	61.1	70.7
Limpopo	48.9	57.9
Mpumalanga	47.9	56.8
Northern Cape	61.3	72.3
North West	67.5	75.7
Western Cape	75.7	76.8
South Africa	60.6	67.8

Source: Report on the National Senior Certificate Examination Results 2010, DBE (January 2011).

Table 13 shows that the national pass rate of the NSC examination increased from 60.6% in 2009 to 67.8% in 2010. A similar increasing trend was seen in all provinces, albeit to different degrees.

3.6.3 Frequency interval results of full-time candidates

Source: Report on the National Senior Certificate Examination Results 2010, DBE (January 2011).

Figure 14: Percentage distribution of the National Senior Certificate examination percentage pass rates of schools within different percentage groupings in 2009 and 2010

In 2010, as shown in Table 14 and Figure 14, 7.7% (approximately 502) of the 6 516 schools in South Africa that offered the NSC examination obtained 100% passes. This is higher than the 6.6% of 2009. The percentage of schools that scored a pass rate of between 80% and 100% increased from 24.7% in 2009 to 32.9% in 2010. As for schools that performed poorly, 2.6% of them obtained a pass rate of between 0% and < 20% in 2010, which is lower than the 7.0% of 2009. Nationally, 0.3% of schools (approximately 20) scored a 0% pass rate in 2010, which is the same as in 2009.

3.6.4 Selected subject results of full-time candidates

Figure 15: Percentage distribution of the National Senior Certificate examination achievements at 30% and above for selected subjects in 2009 and 2010

Table 15 and Figure 15 show the achievement rates of candidates in eight selected subjects in the 2009 and 2010 NSC examinations. In both the category 40% and above and the category 30% and above, the highest overall achievement rates were obtained in Life Orientation.

3.7 Annual National Assessments

3.7.1 Introduction

The improvement of the quality and levels of educational outcomes in the schooling system is a top priority of both Government and the Department of Basic Education (DBE). The extent to which these outcomes are achieved will be monitored through the administration of the Annual National Assessments (ANA).

ANA is expected to have four key effects on schools: to expose educators to better assessment practices; to make it easier for districts to identify the schools that are most in need of assistance; to encourage schools to celebrate outstanding performance; and to empower parents with important information about their children's performance.

The ANA of February 2011, which involved standardised literacy and numeracy skills tests written by all learners who had been in Grades 1 to 6 in 2010, was managed by the schools themselves. This series of tests is referred to as the "Universal ANA".

The Human Sciences Research Council (HSRC) was appointed to independently verify the Universal ANA. The HSRC did the "Verification ANA", as it is commonly referred to, by analysing and reporting on the Grade 3 (Literacy and Numeracy) and Grade 6 (Language and Mathematics) tests received from a representative sample of 1 800 schools.

This report deals only with the outcome of the Verification ANA.

3.7.2 Analysis based on Grade 3 test instruments

Table 16: Average percentage scores of learners in Grade 3 Literacy and Numeracy, by province, in 2011

Province	Literacy ¹⁾	Numeracy ¹⁾
Eastern Cape	39	35
Free State	37	26
Gauteng	35	30
KwaZulu-Natal	39	31
Limpopo	30	20
Mpumalanga	27	19
Northern Cape	28	21
North West	30	21
Western Cape	43	36
South Africa	35	28

Source: Report on the Annual National Assessments of 2011, DBE (June 2011).

1) See footnote on the next page for interpretation of scores.

Table 16 shows that, in 2011, the average score for a typical Grade 3 learner in South Africa was 35% in Literacy and 28% in Numeracy. The Literacy score was at the 'partially achieved (35 – 49%)' level and the Numeracy score at the 'not achieved (0 – 34%)' level¹.

Figure 16: Percentage of learners in various achievement levels for Grade 3 Literacy, by province, in 2011

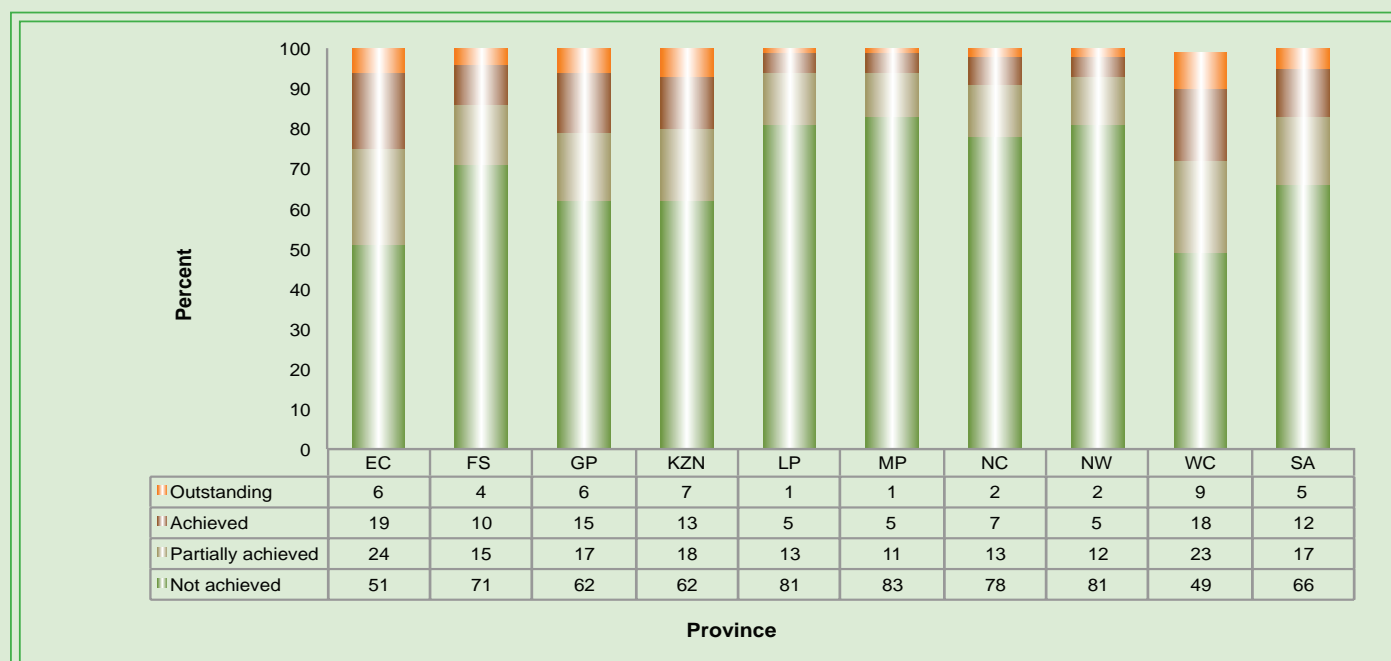

Source: Report on the Annual National Assessments of 2011, DBE (June 2011).

Note: As a result of rounding off, percentages may not necessarily add up to 100% in each column.

A critical statistic is the percentage of learners achieving a score that represents at least partial achievement (35% and above), meaning that they have achieved at least a reasonable part of the knowledge and skills they should have achieved by their grade. In Grade 3 Literacy in 2011, as shown in Figure 16, this statistic was 47% at the national level.

Figure 17: Percentage of learners in various achievement levels for Grade 3 Numeracy, by province, in 2011

Source: Report on the Annual National Assessments of 2011, DBE (June 2011).

Note: As a result of rounding off, percentages may not necessarily add up to 100% in each column.

1 Key to levels of achievement

Level Code	Description of Achievement	Marks in Percentages
4	Outstanding	70 and above
3	Achieved	50 – 69
2	Partially achieved	35 – 49
1	Not achieved	0 – 34

Figure 17 shows that, in Grade 3 Numeracy, in 2011, 34% of learners at the national level attained a level of performance that represented at least partial achievement.

Table 17: Average percentage scores of learners in Grade 3 Literacy and Numeracy, by quintile, in 2011

Quintile	Literacy ¹⁾	Numeracy ¹⁾
1 - The Poorest	31	24
2	30	22
3	33	26
4	37	29
5 - The Least Poor	49	42

Source: The 2011 Grade 3 and 6 Verification Annual National Assessment report, HSRC (November 2011).

1) See footnote at Table 16.

Table 17 shows that, in 2011, the average Grade 3 learner in the least poor schools (quintile 5) performed at the 'partially achieved (35 - 49%)' level in both Literacy and Numeracy. In the poorest schools (quintile 1), the performance of an average learner was at the 'not achieved (0 - 34%)' level in both Literacy and Numeracy.

Figure 18: Percentage of learners in various achievement levels for Grade 3 Literacy, by quintile, in 2011

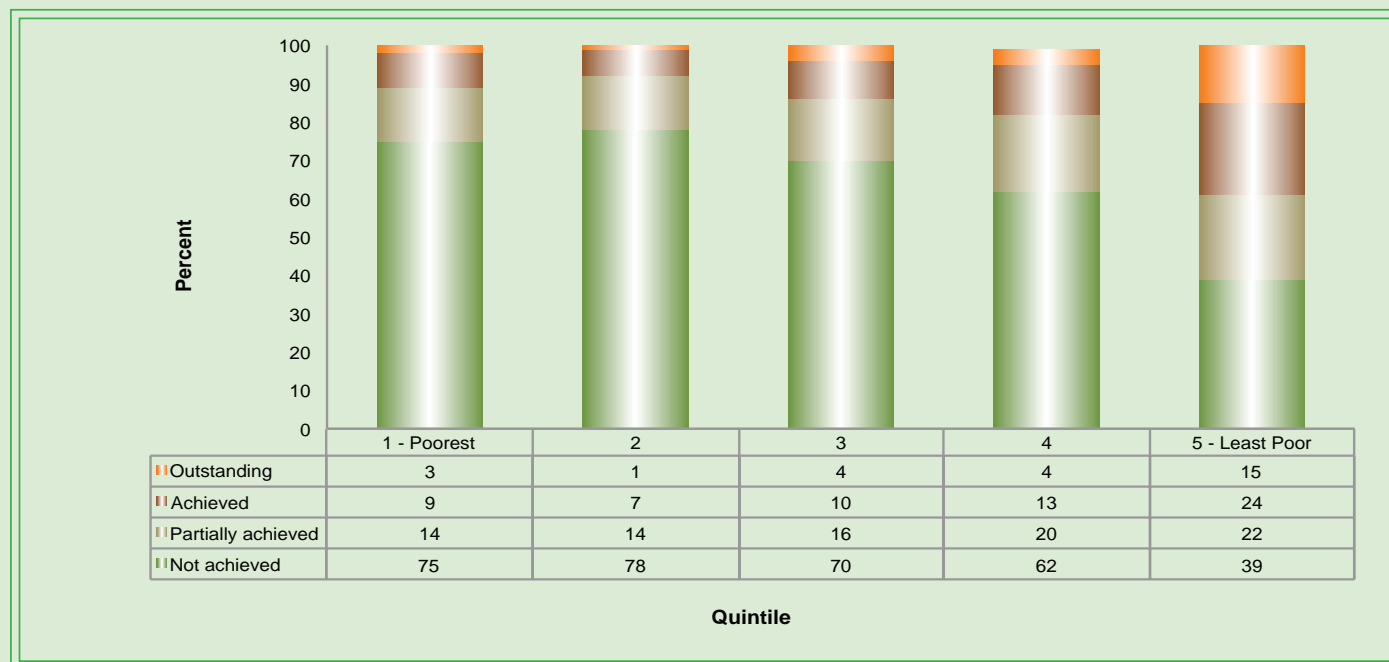

Source: The 2011 Grade 3 and 6 Verification Annual National Assessment report, HSRC (November 2011).

Note: As a result of rounding off, percentages may not necessarily add up to 100% in each column.

Figure 18 shows that, in Grade 3 Literacy, in 2011, 40% of learners in the poorest schools (quintile 1) and 71% of learners in the least poor schools (quintile 5) reached at least a 'partially achieved' level of performance.

Note: As a result of rounding off, percentages may not necessarily add up to 100% in each column.

Figure 19 shows that, in Grade 3 Numeracy, in 2011, 26% of learners in the poorest schools (quintile 1) and 61% of learners in the least poor schools (quintile 5) attained a level of performance that represented at least partial achievement.

3.7.3 Analysis based on Grade 6 test instruments

Table 18: Average percentage scores of learners in Grade 6 Language and Mathematics, by province, in 2011

Province	Language ¹⁾	Mathematics ¹⁾
Eastern Cape	29	29
Free State	23	28
Gauteng	35	37
KwaZulu-Natal	29	32
Limpopo	21	25
Mpumalanga	20	25
Northern Cape	27	28
North West	22	26
Western Cape	40	41
South Africa	28	30

Source: *Report on the Annual National Assessments of 2011*, DBE (June 2011).

1) See footnote at Table 16.

Table 18 shows that, in 2011, the average score for a typical Grade 6 learner in South Africa was 28% in Language and 30% in Mathematics. Both of these scores were at the 'not achieved (0 – 34%)' level.

Figure 20: Percentage of learners in various achievement levels for Grade 6 Language, by province, in 2011

Source: Report on the Annual National Assessments of 2011, DBE (June 2011).
 Note: As a result of rounding off, percentages may not necessarily add up to 100% in each column.

Figure 20 shows that, in Grade 6 Language, in 2011, 30% of learners nationally reached at least the ‘partially achieved’ level.

Figure 21: Percentage of learners in various achievement levels for Grade 6 Mathematics, by province, in 2011

Source: Report on the Annual National Assessments of 2011, DBE (June 2011).
 Note: As a result of rounding off, percentages may not necessarily add up to 100% in each column.

Figure 21 shows that, in Grade 6 Mathematics, in 2011, 31% of learners nationally reached at least a ‘partially achieved’ level of performance.

Table 19: Average percentage scores of learners in Grade 6 Language and Mathematics, by quintile, in 2011

Quintile	Language ¹⁾	Mathematics ¹⁾
1 - The Poorest	21	26
2	22	26
3	26	29
4	34	34
5 - The Least Poor	47	47

Source: *The 2011 Grade 3 and 6 Verification Annual National Assessment report*, HSRC (November 2011).

1) See footnote at Table 16.

Table 19 shows that, in 2011, the average Grade 6 learner in the least poor schools (quintile 5) performed at the 'partially achieved (35 - 49%)' level in both Language and Mathematics. In the poorest schools (quintile 1), the performance of an average learner was at the 'not achieved (0 - 34%)' level in both Language and Mathematics.

Figure 22: Percentage of learners in various achievement levels for Grade 6 Language, by quintile, in 2011

Source: *The 2011 Grade 3 and 6 Verification Annual National Assessment report*, HSRC (November 2011).

Note: As a result of rounding off, percentages may not necessarily add up to 100% in each column.

Figure 22 shows that, in Grade 6 Language, in 2011, 17% of learners in the poorest schools (quintile 1) and 72% of learners in the least poor schools (quintile 5) reached at least the 'partially achieved' level.

Figure 23: Percentage of learners in various achievement levels for Grade 6 Mathematics, by quintile, in 2011

Source: *The 2011 Grade 3 and 6 Verification Annual National Assessment report*, HSRC (November 2011).

Note: As a result of rounding off, percentages may not necessarily add up to 100% in each column.

Figure 23 shows that, in Grade 6 Mathematics, in 2011, 23% of learners in the poorest schools (quintile 1) and 68% of learners in the least poor schools (quintile 5) attained a level of performance that represented at least partial achievement.

Sources:

2009: As published in *Education Statistics in South Africa*.

2010: All these data were extracted from the Annual Surveys, except for the SNE data for North West, which were extracted from the SNAP Survey.

Note 1: Institution count is based on open institutions that submitted the survey forms.

Table 20 reflects learners and educators in early childhood development (ECD) sites and in special schools, which cater for special needs education (SNE) learners, and the numbers of these institutions, in 2009 and 2010. As can be expected, in some cases, the figures were higher in 2010 than in 2009, while, in other cases, the opposite is true.

Table 20 also shows the national LER, LSR and ESR for these two education sectors.

5. EXPLANATORY NOTES

5.1 Introduction

The publication comprises aggregated information from all education institutions elaborated in the scope of the surveys below. The information in the publication reflects the situation during the 2010 academic year.

5.2 Scope of the surveys

The census frame covers the following education sectors:

- Ordinary schools (public and independent);
- Early childhood development (ECD) centres (public and independent);
- Special schools (public and independent).

5.3 Survey methodology and design

The process of acquiring education information involves the national and provincial education departments (PEDs) as well as education regions and districts and education institutions, and adheres to the following two processes:

5.3.1 Data acquisition

The Department of Basic Education (DBE) consults with PEDs and all other stakeholders on education information user needs, and designs all required data acquisition instruments. Once this has been done, HEDCOM (Heads of Education Departments Committee) authorises these survey instruments. The DBE also develops and implements policy, standards, definitions and classifications for national alignment, standardisation and uniformity in the collection of education information.

PEDs utilise the national data acquisition instruments to collect and process education information for submission to the DBE. The process and information platforms that the PEDs utilise adhere to nationally instituted standards.

The DBE then integrates education information collected by the PEDs to create a national database and to update it.

5.3.2 Reporting and dissemination

Education information is sent directly to its users and is posted on the DBE's website. Current statistical publications on the website are:

- Education Statistics in South Africa at a Glance (1999 to 2005);
- Education Statistics in South Africa (2006 to 2009); and
- School Realities (2005 to 2011).

5.4 Comparability with previous censuses

The 2010 census is generally comparable with the 2009 census, owing to the fact that both censuses are based on the new provincial demarcation boundaries.

5.5 Response rate

Approximately 99.8% of open ordinary schools submitted the 2010 survey forms. Imputation was done to establish a data set of 100%.

5.6 Users

The principal users of EMIS data are the Minister of Education, Parliament, the DBE, National Treasury, other government departments, international agencies such as UNESCO, and regional EMIS bodies.

Other users include researchers, parents and the general public, school book publishers and the general publishing media in the country.

5.7 Glossary

ABET centre

Education institutions that offer adult basic education and training (ABET) programmes as provided for in the ABET Act.

Administrative staff

Employees who provide services to offices and institutions. Examples: secretaries, typists, administrative clerks and accountants.

Combined school

An ordinary school offering at least one grade in each of the following four phases: foundation phase, intermediate phase, senior phase and further education and training (FET) band.

District management area (DMA)

A municipal area which may include a nature reserve, a game reserve or a wildlife sanctuary.

ECD centre

Any building or premises maintained or used, whether or not for gain, for the admission, protection and temporary or partial care of more than six children away from their parents. Depending on the conditions of its registration, an ECD centre can admit babies, toddlers and/or children of pre-school age. Synonyms for an ECD centre: ECD site, day-care centre, preschool, crèche, nursery, playgroup, etc.

Education district/region

The geographic area within a province that has been demarcated by the Member of the Executive Council (MEC) for Education as the first-level administrative subdivision within a PED.

Educator

Any person who teaches, educates or trains other persons or who provides professional education services.

Educator-school ratio (ESR)

The average number of educators per school.

FET band

Grades 10 to 12 offered at ordinary schools.

FET college

A public or private institution that is established, declared or registered under the FETC Act, but does not include a school offering FET programmes under the SASA, or a college under the authority of a government department other than the Department of Higher Education and Training.

Foundation phase

The first phase of the school curriculum applicable to Grade R (reception year) and Grades 1 to 3.

Gender parity index (GPI)

The ratio of female to male values of a given indicator.

General education and training (GET) band

Grade R and Grades 1 to 9 offered at ordinary schools.

Gross enrolment ratio (GER)

The number of learners enrolled in a given level of education, regardless of age, expressed as a percentage of the population in the theoretical age group for the same level of education.

Hostel staff

Persons employed for the administration, maintenance and management of the hostel.

Independent school

A school registered or deemed to be registered in terms of section 46 of the SASA.

Indicator

A measure designed to assess the performance of a system, policy, programme or project.

Intermediate phase

The second phase of the school curriculum applicable to Grades 4 to 6.

Intermediate school

An ordinary school offering both upper primary grades and lower secondary grades.

Learner

Any person receiving education or obliged to receive education in terms of the SASA.

Learner-educator ratio (LER)

The average number of learners per educator at a specific level of education in a given school year.

Learner-school ratio (LSR)

The average number of learners per school.

Ordinary school

A school that is not a special school.

Post-matric

An instructional programme offered by a school to learners who have completed Grade 12.

Primary school

An ordinary school offering at least one grade in the range Grades R to 7, and no grades in the range Grades 8 to 12.

Professional non-teaching staff

Staff members of a school who are registered with a professional body other than the South African Council for Educators (SACE). Examples: paramedics, social workers, caregivers, therapists and psychologists.

Public school

A school contemplated in Chapter 3 of the SASA.

Quintile

One of five poverty-based categories to which public schools are allocated for purposes of non-personnel funding by PEDs. Quintile 1 schools are the poorest and Quintile 5 schools are the least poor.

School

An education institution which enrolls learners in one or more grades from Grade R to Grade 12.

Secondary school

An ordinary school offering at least one grade in the range Grades 8 to 12, and no grades in the range Grades 1 to 7.

Senior phase

The third phase of the school curriculum applicable to Grades 7 to 9.

Special needs education (SNE)

Specialised education, provided in special or ordinary schools, that addresses barriers to learning and development experienced by learners with specific or severe learning difficulties or disabilities.

Special school

A school that caters for learners who have special education needs owing to severe learning difficulties, physical disabilities or behavioural problems.

Support staff

Staff employed at a school to support the core functions of a school. Examples: laboratory assistants, cleaners, kitchen staff, gardeners, caretakers and messengers.

6. CONTACT DETAILS

ACKNOWLEDGEMENTS

This publication has been produced with assistance and information from the following:

- Several directorates of the Department of Basic Education
- The EMIS units of the provincial education departments
- Statistics South Africa

Did you know?

In 2010 –

approximately 25 in every 100 people in South Africa were learners in the school system.

30 586 institutions, comprising the following, submitted their survey forms:

- 25 850 ordinary public and independent schools
- 4 313 ECD centres
- 423 special schools

of every 1 000 learners in the school system in South Africa –

- 934 were in ordinary public schools
- 36 were in ordinary independent schools
- 22 were in ECD centres
- 8 were in special schools
